Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 August 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 96,880 Bull.

Bull discloses the same invention being an actuator for moving an intraluminal shaft, the actuator comprising a housing (A) having a channel through its center with multiple inclined opposing surfaces, a pivotable actuator assembly (figure 2) having first and second spaced apart jaws (L), and a shaft (D). The jaws engage opposing inclined surfaces of the housing that allow them to be in a first nongripping position with a large dimension and a second gripping position where they engage the shaft and have a smaller dimension. Bull further discloses another gripping surface b that is curved.

Response to Arguments

Applicant's arguments filed 8/2/06 have been fully considered but they are not persuasive. The applicant argues that the actuator of Bull fails to disclose that the actuator is coupled to the housing by a pivot coupled to the housing. However as shown in figure 2 of Bull the actuator assembly is contained within the housing A and is pivotally coupled to the housing by curved pivot surfaces. A figure is included for further

clarification. The applicant further argues that the Jaws (L) do not releasably engage the shaft. However it is abundantly clear from figures 1 and 2 that the Jaws engage and release the shaft.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
